

Okta Health Check

Ensure your Okta environment is optimized and secure.

Whether helping to establish a baseline with assessments or through advanced initiatives such as user behavior analytics and network deception techniques, the Alchemy **Protect** Practice guides organizations through their security journey.

Alchemy's **Protect** Practice focuses on Workspace Security, Data Protection and Identity Management with an emphasis on delivering security solutions that deliver maximum protection and little or no end-user friction.

Let the transformation begin.

ALCHEMY
TECH GROUP

Alchemy Technology Group is an industry leading IT advisory, consulting and reseller firm focused on end user experience, security, cloud and automation.

Assessment Overview

Alchemy's Okta Health Check is designed to ensure your Okta environment is setup and configured against Alchemy's leading practices. Our professional consultants will work directly with your team to deliver a report with recommendations tailored for your environment to match best practices and secure configurations to protect your data, employees and your business.

Assessment Details

Alchemy security consultants will deliver a tailored workshop including:

1. Discovery Session

- Tenant Overview & Licensing Overview
- Understand Business Goals
- Identity Strategies

2. Assessment

- Tenant Settings
- Security Configurations
- Application Settings

Business Outcome

Upon completion, you will get a detailed report showing desired state of your Okta environment that is mapped directly to your business goals and objectives. Throughout the engagement, your staff will participate in the sessions and learn critical areas to consider and secure in your Okta journey.
